

Klappfix

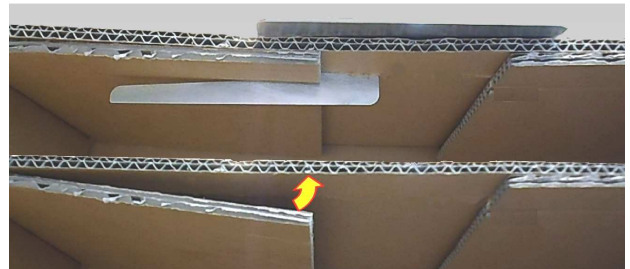

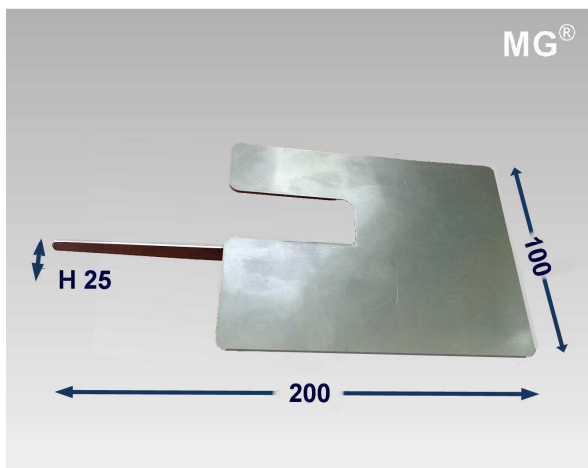

to support inner carton flap

To be used for bottom stapling empty folding boxes with the Blind Stapler TOP as well as for top sealing of cartons not completely filled up to provide high stability.

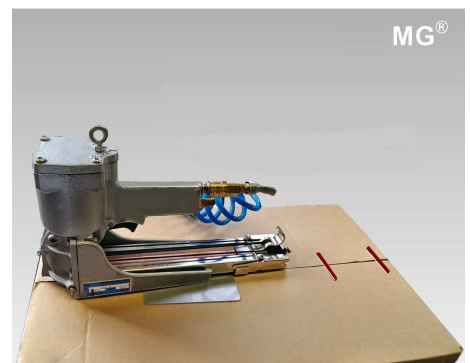

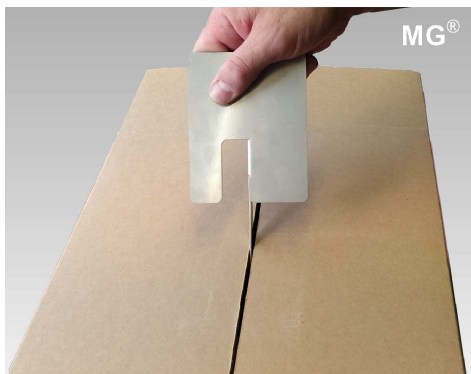

Versatile tool to press the inner against the outer carton flap during stapling from outside. So all carton layers can be perfectly fastened together.

The use of the Klappfix makes sure all carton layers are perfectly fastened because inner and outer flaps are completely stapled together.

Technical datas

measurement:	ca. 200 100 x 25 mm
weight:	160 g
